Subject index of volume 213

(Anti-) Androgenic activity; BHA; (Anti-) Estrogenic activity; Immature rat uterotrophic assay; Hershberger assay **213**, 147

(Anti-) Estrogenic activity; BHA; (Anti-) Androgenic activity; Immature rat uterotrophic assay; Hershberger assay **213**, 147

Akt; ALS; PI3-K; GSK-3; Cell death **213**, 45

ALS; PI3-K; Akt; GSK-3; Cell death **213**, 45

Apoptosis; Cdc2; Cyclin B1; Inflammatory cytokines; EGCG; G2/M interphase; Cell growth arrest; Gene and protein arrays; Prevention; Resveratrol **213**, 81

BHA; (Anti-) Estrogenic activity; (Anti-) Androgenic activity; Immature rat uterotrophic assay; Hershberger assay **213**, 147

Buffaloes; Selenosis; Whole blood selenium concentrations; Glutathione; Glutathione peroxidase **213**, 169

Caco-2 cells; Deoxynivalenol (DON); Fumonisin B1 (FB1); Zearalenone (ZEN); Comparative cytotoxicity **213**, 56

Calpain; Methylmercury; Cerebellar granule neurons; p35; Cyclin-dependent kinase 5; Very-low-concentration neurotoxicity **213**, 97

Carbamoyl-PROXYL; In vivo; ESR; Metallothionein; Glutathione; Free radicals; Rats **213**, 74

Cdc2; Apoptosis; Cyclin B1; Inflammatory cytokines; EGCG; G2/M interphase; Cell growth arrest; Gene and protein arrays; Prevention; Resveratrol **213**, 81

Cell death; ALS; PI3-K; Akt; GSK-3 **213**, 45

Cell growth arrest; Apoptosis; Cdc2; Cyclin B1; Inflammatory cytokines; EGCG; G2/M interphase; Gene and protein arrays; Prevention; Resveratrol **213**, 81

Cell growth; Neuroblastoma; Peroxisome proliferators-activated receptor-γ (PPAR-γ); Glitazone **213**, 157

Cerebellar granule neurons; Methylmercury; p35; Cyclin-dependent kinase 5; Calpain; Very-low-concentration neurotoxicity **213**, 97

Cholinesterase activity; Dichlorvos; Sperm motility; Dimethyl phosphate; Organophosphorus; Pesticide; Rat **213**, 129

Comet assay; 2,4-Diaminotoluene; Uridine uptake assay; Micronucleus test; UDS assay; HepG2 cells **213**, 138

Comparative cytotoxicity; Deoxynivalenol (DON); Fumonisin B1 (FB1); Zearalenone (ZEN); Caco-2 cells **213**, 56

Cyclin B1; Apoptosis; Cdc2; Inflammatory cytokines; EGCG; G2/M interphase; Cell growth arrest; Gene and protein arrays; Prevention; Resveratrol **213**, 81

Cyclin-dependent kinase 5; Methylmercury; Cerebellar granule neurons; p35; Calpain; Very-low-concentration neurotoxicity **213**, 97

Cyclophosphamide; Induction immunosuppression; Methotrexate; Nonhuman primates **213**, 1

Data sharing; Structure–activity relationships; Quantitative structure activity relationships; Toxicology database **213**, 117

doi:10.1016/S0300-483X(05)00395-1

Deoxynivalenol (DON); Fumonisin B1 (FB1); Zearalenone (ZEN); Comparative cytotoxicity; Caco-2 cells **213**, 56

2,4-Diaminotoluene; Uridine uptake assay; Comet assay; Micronucleus test; UDS assay; HepG2 cells **213**, 138

Dichlorvos; Sperm motility; Cholinesterase activity; Dimethyl phosphate; Organophosphorus; Pesticide; Rat **213**, 129

Dimethyl 2,2-dichlorovinyl phosphate (DDVP, dichlorvos); Flow cytometry; Granzyme A; Granulysin; Immunofluorescence microscope; NK; Perforin **213**, 107

Dimethyl phosphate; Dichlorvos; Sperm motility; Cholinesterase activity; Organophosphorus; Pesticide; Rat **213**, 129

DNA breaks; Nanoparticle; TiO_2; Oxidative stress **213**, 66

EGCG; Apoptosis; Cdc2; Cyclin B1; Inflammatory cytokines; G2/M interphase; Cell growth arrest; Gene and protein arrays; Prevention; Resveratrol **213**, 81

Endocrine active substances; Fat tissue; Hormones; Estradiol; Ovx rats **213**, 13

Endocrine disruption; Toxicogenomics; Xenoestrogens; Gene expression **213**, 177

ESR; In vivo; Carbamoyl-PROXYL; Metallothionein; Glutathione; Free radicals; Rats **213**, 74

Estradiol; Endocrine active substances; Fat tissue; Hormones; Ovx rats **213**, 13

Fat tissue; Endocrine active substances; Hormones; Estradiol; Ovx rats **213**, 13

Flow cytometry; Dimethyl 2,2-dichlorovinyl phosphate (DDVP, dichlorvos); Granzyme A; Granulysin; Immunofluorescence microscope; NK; Perforin **213**, 107

Free radicals; In vivo; ESR; Carbamoyl-PROXYL; Metallothionein; Glutathione; Rats **213**, 74

Fumonisin B1 (FB1); Deoxynivalenol (DON); Zearalenone (ZEN); Comparative cytotoxicity; Caco-2 cells **213**, 56

Fumonisin; Mycotoxin; Swine; Susceptibility; Infection; Immune response **213**, 34

G2/M interphase; Apoptosis; Cdc2; Cyclin B1; Inflammatory cytokines; EGCG; Cell growth arrest; Gene and protein arrays; Prevention; Resveratrol **213**, 81

Gene and protein arrays; Apoptosis; Cdc2; Cyclin B1; Inflammatory cytokines; EGCG; G2/M interphase; Cell growth arrest; Prevention; Resveratrol **213**, 81

Gene expression; Toxicogenomics; Endocrine disruption; Xenoestrogens **213**, 177

Glitazone; Neuroblastoma; Peroxisome proliferators-activated receptor-γ (PPAR-γ); Cell growth **213**, 157

Glutathione peroxidase; Selenosis; Whole blood selenium concentrations; Glutathione; Buffaloes **213**, 169

Glutathione; In vivo; ESR; Carbamoyl-PROXYL; Metallothionein; Free radicals; Rats **213**, 74

Glutathione; Lead; Melatonin; Liver; Kidney; Lipid peroxidation; Superoxide dismutase **213**, 25

Glutathione; Selenosis; Whole blood selenium concentrations; Glutathione peroxidase; Buffaloes **213**, 169

Granulysin; Dimethyl 2,2-dichlorovinyl phosphate (DDVP, dichlorvos); Flow cytometry; Granzyme A; Immunofluorescence microscope; NK; Perforin **213**, 107

Granzyme A; Dimethyl 2,2-dichlorovinyl phosphate (DDVP, dichlorvos); Flow cytometry; Granulysin; Immunofluorescence microscope; NK; Perforin **213**, 107

GSK-3; ALS; PI3-K; Akt; Cell death **213**, 45

HepG2 cells; 2,4-Diaminotoluene; Uridine uptake assay; Comet assay; Micronucleus test; UDS assay **213**, 138

Hershberger assay; BHA; (Anti-) Estrogenic activity; (Anti-) Androgenic activity; Immature rat uterotrophic assay **213**, 147

Hormones; Endocrine active substances; Fat tissue; Estradiol; Ovx rats **213**, 13

Immature rat uterotrophic assay; BHA; (Anti-) Estrogenic activity; (Anti-) Androgenic activity; Hershberger assay **213**, 147

Immune response; Mycotoxin; Swine; Fumonisin; Susceptibility; Infection **213**, 34

Immunofluorescence microscope; Dimethyl 2,2-dichlorovinyl phosphate (DDVP, dichlorvos); Flow cytometry; Granzyme A; Granulysin; NK; Perforin **213**, 107

In vivo; ESR; Carbamoyl-PROXYL; Metallothionein; Glutathione; Free radicals; Rats **213**, 74

Induction immunosuppression; Cyclophosphamide; Methotrexate; Nonhuman primates **213**, 1

Infection; Mycotoxin; Swine; Fumonisin; Susceptibility; Immune response **213**, 34

Inflammatory cytokines; Apoptosis; Cdc2; Cyclin B1; EGCG; G2/M interphase; Cell growth arrest; Gene and protein arrays; Prevention; Resveratrol **213**, 81

Kidney; Lead; Melatonin; Liver; Lipid peroxidation; Superoxide dismutase; Glutathione **213**, 25

Lead; Melatonin; Liver; Kidney; Lipid peroxidation; Superoxide dismutase; Glutathione **213**, 25

Lipid peroxidation; Lead; Melatonin; Liver; Kidney; Superoxide dismutase; Glutathione **213**, 25

Liver; Lead; Melatonin; Kidney; Lipid peroxidation; Superoxide dismutase; Glutathione **213**, 25

Melatonin; Lead; Liver; Kidney; Lipid peroxidation; Superoxide dismutase; Glutathione **213**, 25

Metallothionein; In vivo; ESR; Carbamoyl-PROXYL; Glutathione; Free radicals; Rats **213**, 74

Methotrexate; Cyclophosphamide; Induction immunosuppression; Nonhuman primates **213**, 1

Methylmercury; Cerebellar granule neurons; p35; Cyclin-dependent kinase 5; Calpain; Very-low-concentration neurotoxicity **213**, 97

Micronucleus test; 2,4-Diaminotoluene; Uridine uptake assay; Comet assay; UDS assay; HepG2 cells **213**, 138

Mycotoxin; Swine; Fumonisin; Susceptibility; Infection; Immune response **213**, 34

Nanoparticle; TiO_2; DNA breaks; Oxidative stress **213**, 66

Neuroblastoma; Peroxisome proliferators-activated receptor-γ (PPAR-γ); Glitazone; Cell growth **213**, 157

NK; Dimethyl 2,2-dichlorovinyl phosphate (DDVP, dichlorvos); Flow cytometry; Granzyme A; Granulysin; Immunofluorescence microscope; Perforin **213**, 107

Nonhuman primates; Cyclophosphamide; Induction immunosuppression; Methotrexate **213**, 1

Organophosphorus; Dichlorvos; Sperm motility; Cholinesterase activity; Dimethyl phosphate; Pesticide; Rat **213**, 129

Ovx rats; Endocrine active substances; Fat tissue; Hormones; Estradiol **213**, 13

Oxidative stress; Nanoparticle; TiO_2; DNA breaks **213**, 66

p35; Methylmercury; Cerebellar granule neurons; Cyclin-dependent kinase 5; Calpain; Very-low-concentration neurotoxicity **213**, 97

Perforin; Dimethyl 2,2-dichlorovinyl phosphate (DDVP, dichlorvos); Flow cytometry; Granzyme A; Granulysin; Immunofluorescence microscope; NK **213**, 107

Peroxisome proliferators-activated receptor-γ (PPAR-γ); Neuroblastoma; Glitazone; Cell growth **213**, 157

Pesticide; Dichlorvos; Sperm motility; Cholinesterase activity; Dimethyl phosphate; Organophosphorus; Rat **213**, 129

PI3-K; ALS; Akt; GSK-3; Cell death **213**, 45

Prevention; Apoptosis; Cdc2; Cyclin B1; Inflammatory cytokines; EGCG; G2/M interphase; Cell growth arrest; Gene and protein arrays; Resveratrol **213**, 81

Quantitative structure activity relationships; Structure–activity relationships; Toxicology database; Data sharing **213**, 117

Rat; Dichlorvos; Sperm motility; Cholinesterase activity; Dimethyl phosphate; Organophosphorus; Pesticide **213**, 129

Rats; In vivo; ESR; Carbamoyl-PROXYL; Metallothionein; Glutathione; Free radicals **213**, 74

Resveratrol; Apoptosis; Cdc2; Cyclin B1; Inflammatory cytokines; EGCG; G2/M interphase; Cell growth arrest; Gene and protein arrays; Prevention **213**, 81

Selenosis; Whole blood selenium concentrations; Glutathione; Glutathione peroxidase; Buffaloes **213**, 169

Sperm motility; Dichlorvos; Cholinesterase activity; Dimethyl phosphate; Organophosphorus; Pesticide; Rat **213**, 129

Structure–activity relationships; Quantitative structure activity relationships; Toxicology database; Data sharing **213**, 117

Superoxide dismutase; Lead; Melatonin; Liver; Kidney; Lipid peroxidation; Glutathione **213**, 25

Susceptibility; Mycotoxin; Swine; Fumonisin; Infection; Immune response **213**, 34

Swine; Mycotoxin; Fumonisin; Susceptibility; Infection; Immune response **213**, 34

TiO_2; Nanoparticle; DNA breaks; Oxidative stress **213**, 66

Toxicogenomics; Endocrine disruption; Xenoestrogens; Gene expression **213**, 177

Toxicology database; Structure–activity relationships; Quantitative structure activity relationships; Data sharing **213**, 117

UDS assay; 2,4-Diaminotoluene; Uridine uptake assay; Comet assay; Micronucleus test; HepG2 cells **213**, 138

Uridine uptake assay; 2,4-Diaminotoluene; Comet assay; Micronucleus test; UDS assay; HepG2 cells **213**, 138

Very-low-concentration neurotoxicity; Methylmercury; Cerebellar granule neurons; p35; Cyclin-dependent kinase 5; Calpain **213**, 97

Whole blood selenium concentrations; Selenosis; Glutathione; Glutathione peroxidase; Buffaloes **213**, 169

Xenoestrogens; Toxicogenomics; Endocrine disruption; Gene expression **213**, 177
